MATERIAL

M UV Marble Series

R Rock Board Series

- **SPC Rigid Core** High-performance composite panels that combine the exceptional qualities of stone and plastic, delivering outstanding strength and resilience.
- **Decor Film Layer** We offer widely popular texture patterns suitable for various home styles. Our high-definition, intricate textures closely mimic real materials.
- **UV Coating Layer** High-performance UV coating treatment can effectively prevent damage to the board caused by ultraviolet rays.

ADVANTAGES

Waterproof
SPC UV BOARD has the advantage of being waterproof and moisture-resistant, addressing the weakness of traditional wall panels that are susceptible to water.

Fireproof
The combustion test level reaches B1, and the material is effectively fireproof.

Eco-Friendly
Eco-friendly and formaldehyde-free, it is a new type of green and environmentally friendly decorative material.

Easy to Install
Installation is convenient, saving a considerable amount of time and money

Easy to clean
The surface is smooth and easy to clean, preventing the accumulation of stains.

Diverse design options
Offers a wide range of textures and colors suitable for various interior design styles, meeting diverse needs.

DAWN STONE M

1220 x 2440 x 3 mm

The Dawn Stone series is inspired by the pristine white stone patterns, crafting a refreshingly serene visual experience. Like the first light of dawn, it brings a renewed sense of hope and a bright spatial dimension. This series transcends mere wall panels; it's a testament to the harmonious fusion of art and nature, adding tranquility to home life.

CLASSICAL ROCK ESSENCE R

1220 x 2440 x 3 mm

The Classical Rock Essence series embodies a perfect blend of European classicism and natural aesthetics. Each rock board is a testament to time, bearing the imprints of geological history. Its textures are profound and artistic, as if reviving the elegance and durability of ancient stone in modern design. This is more than just a wall decoration; it is a legacy of culture and history, offering a perfect choice for those who seek a refined quality of life.

PREMIUM NEUTRAL SILICONE SEALANT

DESCRIPTION

It is a one-component, medium modulus, neutral silicone sealant, demonstrating good adhesion to most common buildingmaterials, e.g. metal, stone,glass,non-oily wood, silicone rubber, ceramic, natural and synthetic fiber, brick, concrete, painted and many plastic surfaces.

WHERE TO USE

It is fit for sealing movement joints of door and windowand others', where durable and fast bonding is expected. Apply sealant when surface temperature is between 5°C to40°C.

- ☑ Easy to Use
- ☑ Excellent Adhesion
- ☑ Waterproofing

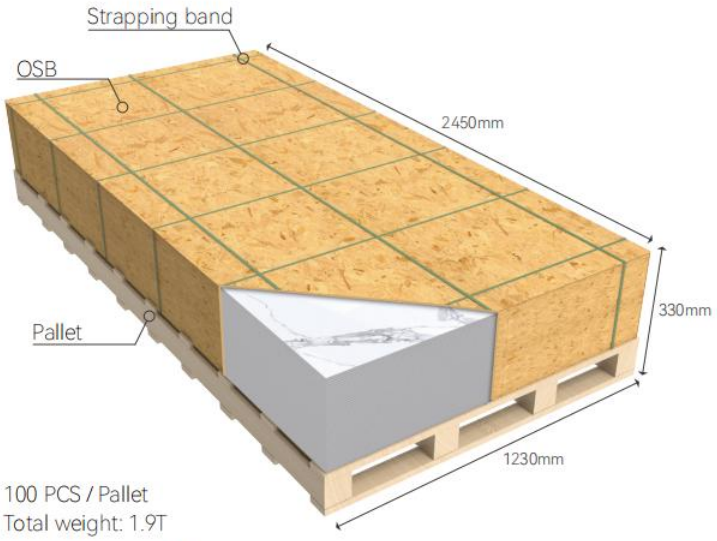
PACKAGING & SHIPPING



100 PCS / Pallet
Total weight: 1.9T

The product dimensions shown in the image are 1220x2440mm

PALLET PACKAGING

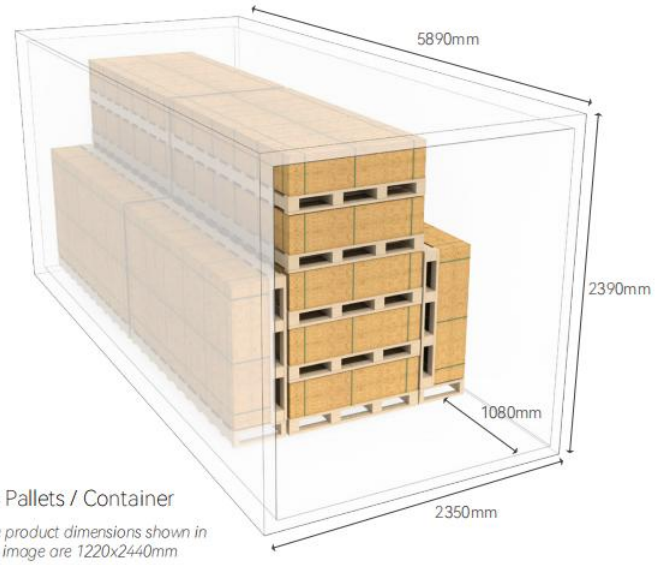
- Each pallet is loaded with 100 pieces of the product. Chipboard is used to cover five sides for protection, and strapping bands secure the products, ensuring safety during transportation.
- The total weight of each pallet is approximately 1.9 tons, optimizing transportation efficiency while considering load safety.

CONTAINER LOADING

- For products measuring 2440mm in length, a 20-foot container can hold 14 pallets
- When pallets are placed on their sides, an additional pallet is added underneath for enhanced stability.
- The minimum order quantity for each design is 100 pieces, meeting diverse customer needs.

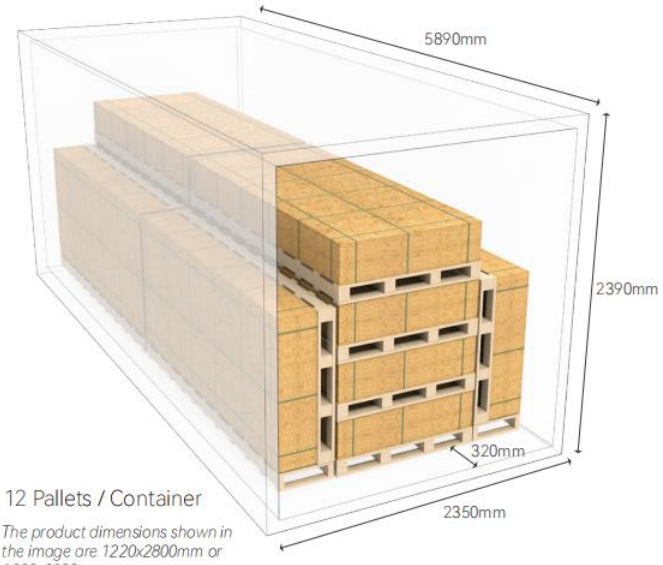
NOTE

- Do not dismantle the pallet packaging without permission to avoid affecting product quality and safety.
- Ensure the pallets are securely fixed during transportation to prevent damage due to vibration or tilting.



14 Pallets / Container

The product dimensions shown in the image are 1220x2440mm



12 Pallets / Container

The product dimensions shown in the image are 1220x2800mm or 1220x2900mm

RECOMMENDED FORKLIFT SIZE

Forklifts with a 1.3-meter-wide reach are used for handling pallets, accommodating pallet size and ensuring ease of operation.

PU STONE WALL PANEL

PRODUCT COMPOSITION

聚氨酯石材(PU石材)是一种人造石材制品。聚亚安酯人造石材的设计是为了制造一个非常容易安装的逼真的石材面板。为了制作这些人造石板，将聚亚安酯倒入从真正堆叠的石头铸造而成的模具中。

Polyurethane stone (PU STONE) is a manufactured faux stone product. Polyurethane faux stone was designed to make a realistic looking stone panel that is extremely easy to install. To make these faux stone panels, the polyurethane is poured into molds that have been cast from real stacked stone.

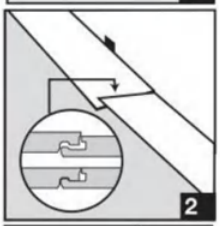
Product parameters

Name	SPC FLOORING
Specification	Wood grain 1220*180mm
Installation method	Glue-free buckle quick installation
Main ingredients	Brand new stone plastic material
Thickness/wear resistance	4mm/5.5mm 0.3mm
Product Features	Glue-free installation, wear-resistant, waterproof and moisture-proof, zero formaldehyde, fireproof

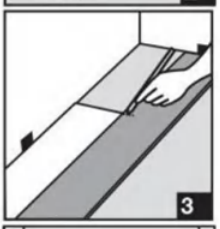
Installation method

1. Start paving from the corner of the wall. Place the tongue side of the board against the corner, leaving a 10mm gap between the corner and the short side of the board.

2. Fix the tongue edge of the second board in the groove of the first board. Carefully arrange the edges to ensure a tight fit. Use a rubber mallet to gently tap the second board toward the first board. Lock them together tightly.

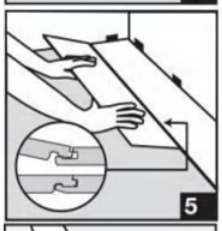


3. Repeat the above steps, continue to splice the first row, use a ruler to measure the distance between the board at the end of the last board and the wall, use a pencil to draw a cutting line on the board, use a utility tool to score the line with a knife, and then break it.



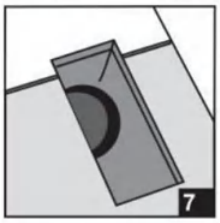
4.Rotate the cutting plate 180°, snap its end tongue into the end groove of the last plate of Round Three, and tap lightly with a rubber hammer until the two plates are laid flat on the floor and reach the length Board splicing, staggering the effect of the round pattern, and adjusting the layout to achieve a balanced effect.

5. To start your second row, rotate the cutting board of the first row 180° so that it returns to its original orientation, tilt and push its side tongue into the side groove of the first board, and adjust the splicing in place. Using a rubber mallet, lightly tap the long side of the board, lock it with the first row of boards, and lay it flat on the ground



6. Place the second plank ofthe new row first on the long side. Push the plate in to make sure the edges are neat. Next, gently tap the top ofthe end joint with a rubberhammer to lock them together. Continue laying the remaining plates in this manner, inorder to accommodate the last row, Place a plate on top ofthe previous row and placeits tongue on the wal. Place a ruler on the plate so that it lines up with the side oftheprevious row, Then use a pencil to draw a line on the new plate. Cut the plate with a toolknife and secure it in place.

7. Door frames and heating vents also require room for expansion. Start by cutting the board to the correct length, then place the cut board next to its actual location. Use a ruler to measure and mark the area to be cut. Cut off the marked points so that each side has the necessary extension distance.



8. You can turn the board upside down and use a craft knife to cut off the necessary height so the board can easily slide under the door frame. Once the flooring is fully installed, remove the spacers.
